Professional Summary

Software Engineering student and junior backend developer with hands-on experience building REST APIs and backend systems using **Python, FastAPI, TypeScript, Node.js, Express, PostgreSQL, SQLAlchemy, and Docker**.

Experience through collaborative software projects implementing authentication, relational data models, database migrations, layered architecture, and transactional business logic.

Currently completing Riwi's Software Development Program while pursuing a B.S. in Software Engineering.

Native Spanish speaker with B2+ professional English.

Projects

TourPoints Backend *GitHub Repository*

Collaborative Backend Project | FastAPI | PostgreSQL | SQLAlchemy | Alembic | JWT | Docker

- Developed REST API functionality for a gamified tourism platform using **FastAPI, PostgreSQL, and SQLAlchemy**.
- Implemented **JWT authentication** and contributed to a layered architecture following the Router → Service → Repository → Model pattern.
- Managed database schema evolution and migrations using **Alembic** and containerized the backend environment with **Docker**.
- Developed business logic for the **rewards system** and an **append-only points ledger** used to record and track point transactions.
- Collaborated with another developer using Git and GitHub within a shared backend codebase, with clearly separated feature ownership.

Riwi Cine API *GitHub Repository*

Collaborative Project – In Progress | Node.js | TypeScript | Express | PostgreSQL | Sequelize

- Developing RESTful backend functionality as part of a collaborative Riwi software engineering project.
- Working with **Node.js, TypeScript, Express, PostgreSQL, and Sequelize** within a shared Git/GitHub development workflow.
- Contributing to modular backend development involving relational data modeling, API design, and business logic.

Backend Engineering Portfolio *GitHub Profile*

Collection of backend-focused academic and personal projects demonstrating software development fundamentals and continued technical growth.

- Built backend-focused learning projects using **Python, JavaScript, TypeScript, SQL, APIs, Git, and relational databases**.
- Applied backend development concepts including API design, database interaction, version control, and modular code organization.

Technical Skills

Languages: Python, TypeScript, JavaScript (ES6+), SQL

Backend: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication, SQLAlchemy, Sequelize ORM

Databases: PostgreSQL, MySQL

DevOps & Tools: Docker, Docker Compose, Git, GitHub, Linux, VS Code, Postman, Alembic

Engineering: Layered Architecture, Repository Pattern, SOLID Principles, MVC, API Design, Git Flow

Methodologies: Agile, Scrum, Collaborative Development, Technical Documentation

Education

Universidad Manuela Beltrán Colombia

B.S. in Software Engineering 2024 – Present

Riwi Barranquilla, Colombia

Software Development Program 2026 – Present

Experience

OP360 (OfficePartners360) Barranquilla, Colombia
Customer Support Specialist Jan 2025 – Dec 2025

- Delivered bilingual customer support through phone, email, and live chat while consistently working against service-level KPIs.
- Managed CRM records, appointment scheduling, and customer case follow-ups using Zoho CRM and RingCentral.
- Strengthened analytical problem-solving, communication, adaptability, and customer-facing skills in an international environment.

Atlantic Quantum Innovations Barranquilla, Colombia
Healthcare Customer Support Jul 2024 – Dec 2024

- Provided bilingual support to patients and healthcare providers through phone, chat, and email.
- Coordinated appointment scheduling, referrals, follow-ups, and accurate CRM records in a high-volume environment.
- Developed professional communication, problem-solving, and attention-to-detail skills while working with multidisciplinary teams.
